The spread of the white potato over 400 years ago revolutionized the world’s food supply. One writer even went so far as to proclaim that the planting of the first white potatoes in Europe “probably changed more lives than the deeds of a hundred kings.”

In the mid-1500s, Spanish explorers discovered the Inca growing white potatoes in the Andes Mountains of modern-day Peru and Chile and brought the plant to Europe. Even though there was some resistance to eating potatoes for the next 200 years, eventually the white potato became the world’s most widely grown vegetable. The potato was a cheap source of valuable proteins, vitamins, and minerals. This may account for the rapid growth of the European population after 1700.

In the United States, the common white potato is known as the Irish potato. Its official introduction to North America came in 1613 when a shipment from England reached Bermuda, an island about 500 miles east of present-day North Carolina. Eight years later the governor of Bermuda sent a chest filled with potatoes to the governor of the Virginia colony. Yet potatoes did not find wide-spread acceptance on the continent. Potatoes were then reintroduced to the United States in 1719. In that year several Irish immigrants brought potatoes to New Hampshire, and the vegetable finally took hold. It eventually became almost a daily item on American dinner menus.

Today corn and potatoes are the two main vegetable crops in the United States. An acre of potatoes yields almost twice as much food as an acre of grain. This permits the United States to produce around 400 million bags of potatoes annually.
Interpreting Text and Visuals

1. What do the arrows on the map represent? ________________________________________

Why are there two different arrow styles? ________________________________________

2. What European country was first introduced to the potato? _________________________

The potatoes that arrived in Dublin came from which Andean region? ________________

3. Trace the route that the potato took to reach Vienna. ________________________________

What is significant about the year that Vienna got the potato? ________________________

4. Did the potato reach London or Paris first? ________________________________________

5. Which of the European countries shown on the map was last to receive the potato? __________

6. How long did it take for the potato to get from London to the south of France and from Madrid to Rome? ________________________________

7. Explain what the arrow leading from London toward North America represents. _________

8. Why do you think the common white potato is known as the Irish potato in the United States?

CONNECTIONS ACROSS TIME AND CULTURES

Impact of the Columbian Exchange

In this chapter you learned about the colonization of the Americas and the global transfer of plants, animals, foods, and diseases. Which aspects of the Columbian Exchange continue to influence modern-day cultures? To find out, complete the activities that follow.

1. Here is a list of products that people use today. In the space beside each one, explain how it results from the Columbian Exchange. The first is done for you.

2. Under early mercantilism, European nations sought to import raw materials from the Americas and ship manufactured goods to their colonies. Has that pattern changed in today’s world? Give reasons for your answer. __________________________________________________________
________________________________________________________________________________________

3. Diseases from Europe were part of the Columbian Exchange. They devastated the peoples of the Americas. What more recent examples of disease spreading across the globe can you think of? __________________________________________________________
________________________________________________________________________________________

4. Think of foods you and your family have eaten recently. Which originally came from the Americas? Which came from Europe, Asia, or Africa? Use the diagram on page 572 to recall where various foods came from. __________________________________________________________

The Atlantic World 103
**Determining Main Ideas**

Write your answers in the blanks provided.

1. The global transfer of foods, plants, and animals during the colonization of the Americas:

2. New plants that came to the Americas from Europe, Asia, and Africa:

3. The two most important food items that were exported from the Americas:

4. An unwelcome part of the transatlantic trade to the Americas:

5. An economic system based on private ownership and investment of resources for profit:

6. A steady rise in the price of goods:

7. A business venture that involved a number of people combining their wealth for a common purpose:

8. An economic policy that relied on the belief that a country's power depended mainly on its wealth:

9. A country establishes this by selling more goods than it buys:

10. The economic revolution in Europe spurred the growth of these two things:
